THE CHALLENGE FOR DEVELOPERS

Developers face increasing pressures: tight deadlines, complex projects, and the need for continuous learning. Traditional tools lag behind, failing to offer real-time assistance or reward contributions.

MICROGPT

Your AI **Coding Companion**

MicroGPT is your AI coding companion, offering intelligent assistance, optimizing workflows, and introducing a pioneering 'Code to Earn' model to reward your development efforts with **$MICRO**.

UNDER THE HOOD

MicroGPT's Core Technologies

Fine-Tuned LLM: Utilizes a customized LLM specifically optimized for coding tasks, offering precise code suggestions, bug detection, and optimization tips.

Vector Databases: Employs vector databases for efficient retrieval of code snippets and documentation, enabling quick NLP searches and contextual understanding of code.

Blockchain Integration: Leverages blockchain for the 'Code to Earn' feature, ensuring secure and transparent transactions for rewarding developers' contributions.

KEY FEATURES

AI-Powered Code Editor
Offers predictive coding assistance, bug detection, and optimization.

Code to Earn Rewards
Earn $MICRO for contributions & community engagement.

IDE Extensions
Enhance online IDEs with real-time feedback & AI suggestions.

Community Engagement
Stay connected with updates through a dedicated Telegram bot.

Developer Marketplace
A platform for trading coding tools and resources using $MICRO tokens

Analytics Dashboard
Track activity, productivity gains, and earnings in one view.

Customizable User Experience
Personalize themes and settings to suit coding preferences.

Cross-Platform Support
Accessible across various devices and operating systems.

OUR CUTTING-EDGE

Custom LLM
Fine-tuned for coding tasks, providing superior syntax and logic understanding.

Vector Databases
Enables fast, NLP-driven code search and documentation retrieval.

Blockchain Rewards
Secure, transparent 'Code to Earn' system using blockchain technology.

Adaptive AI
Personalizes assistance by learning individual developer styles and preferences.

Decentralized Governance
Empowers users with decision-making on platform updates

Security Protocols
Advanced encryption and security measures to protect data and transactions.

Cross-Platform Integration
Seamless functionality across IDEs and devices.
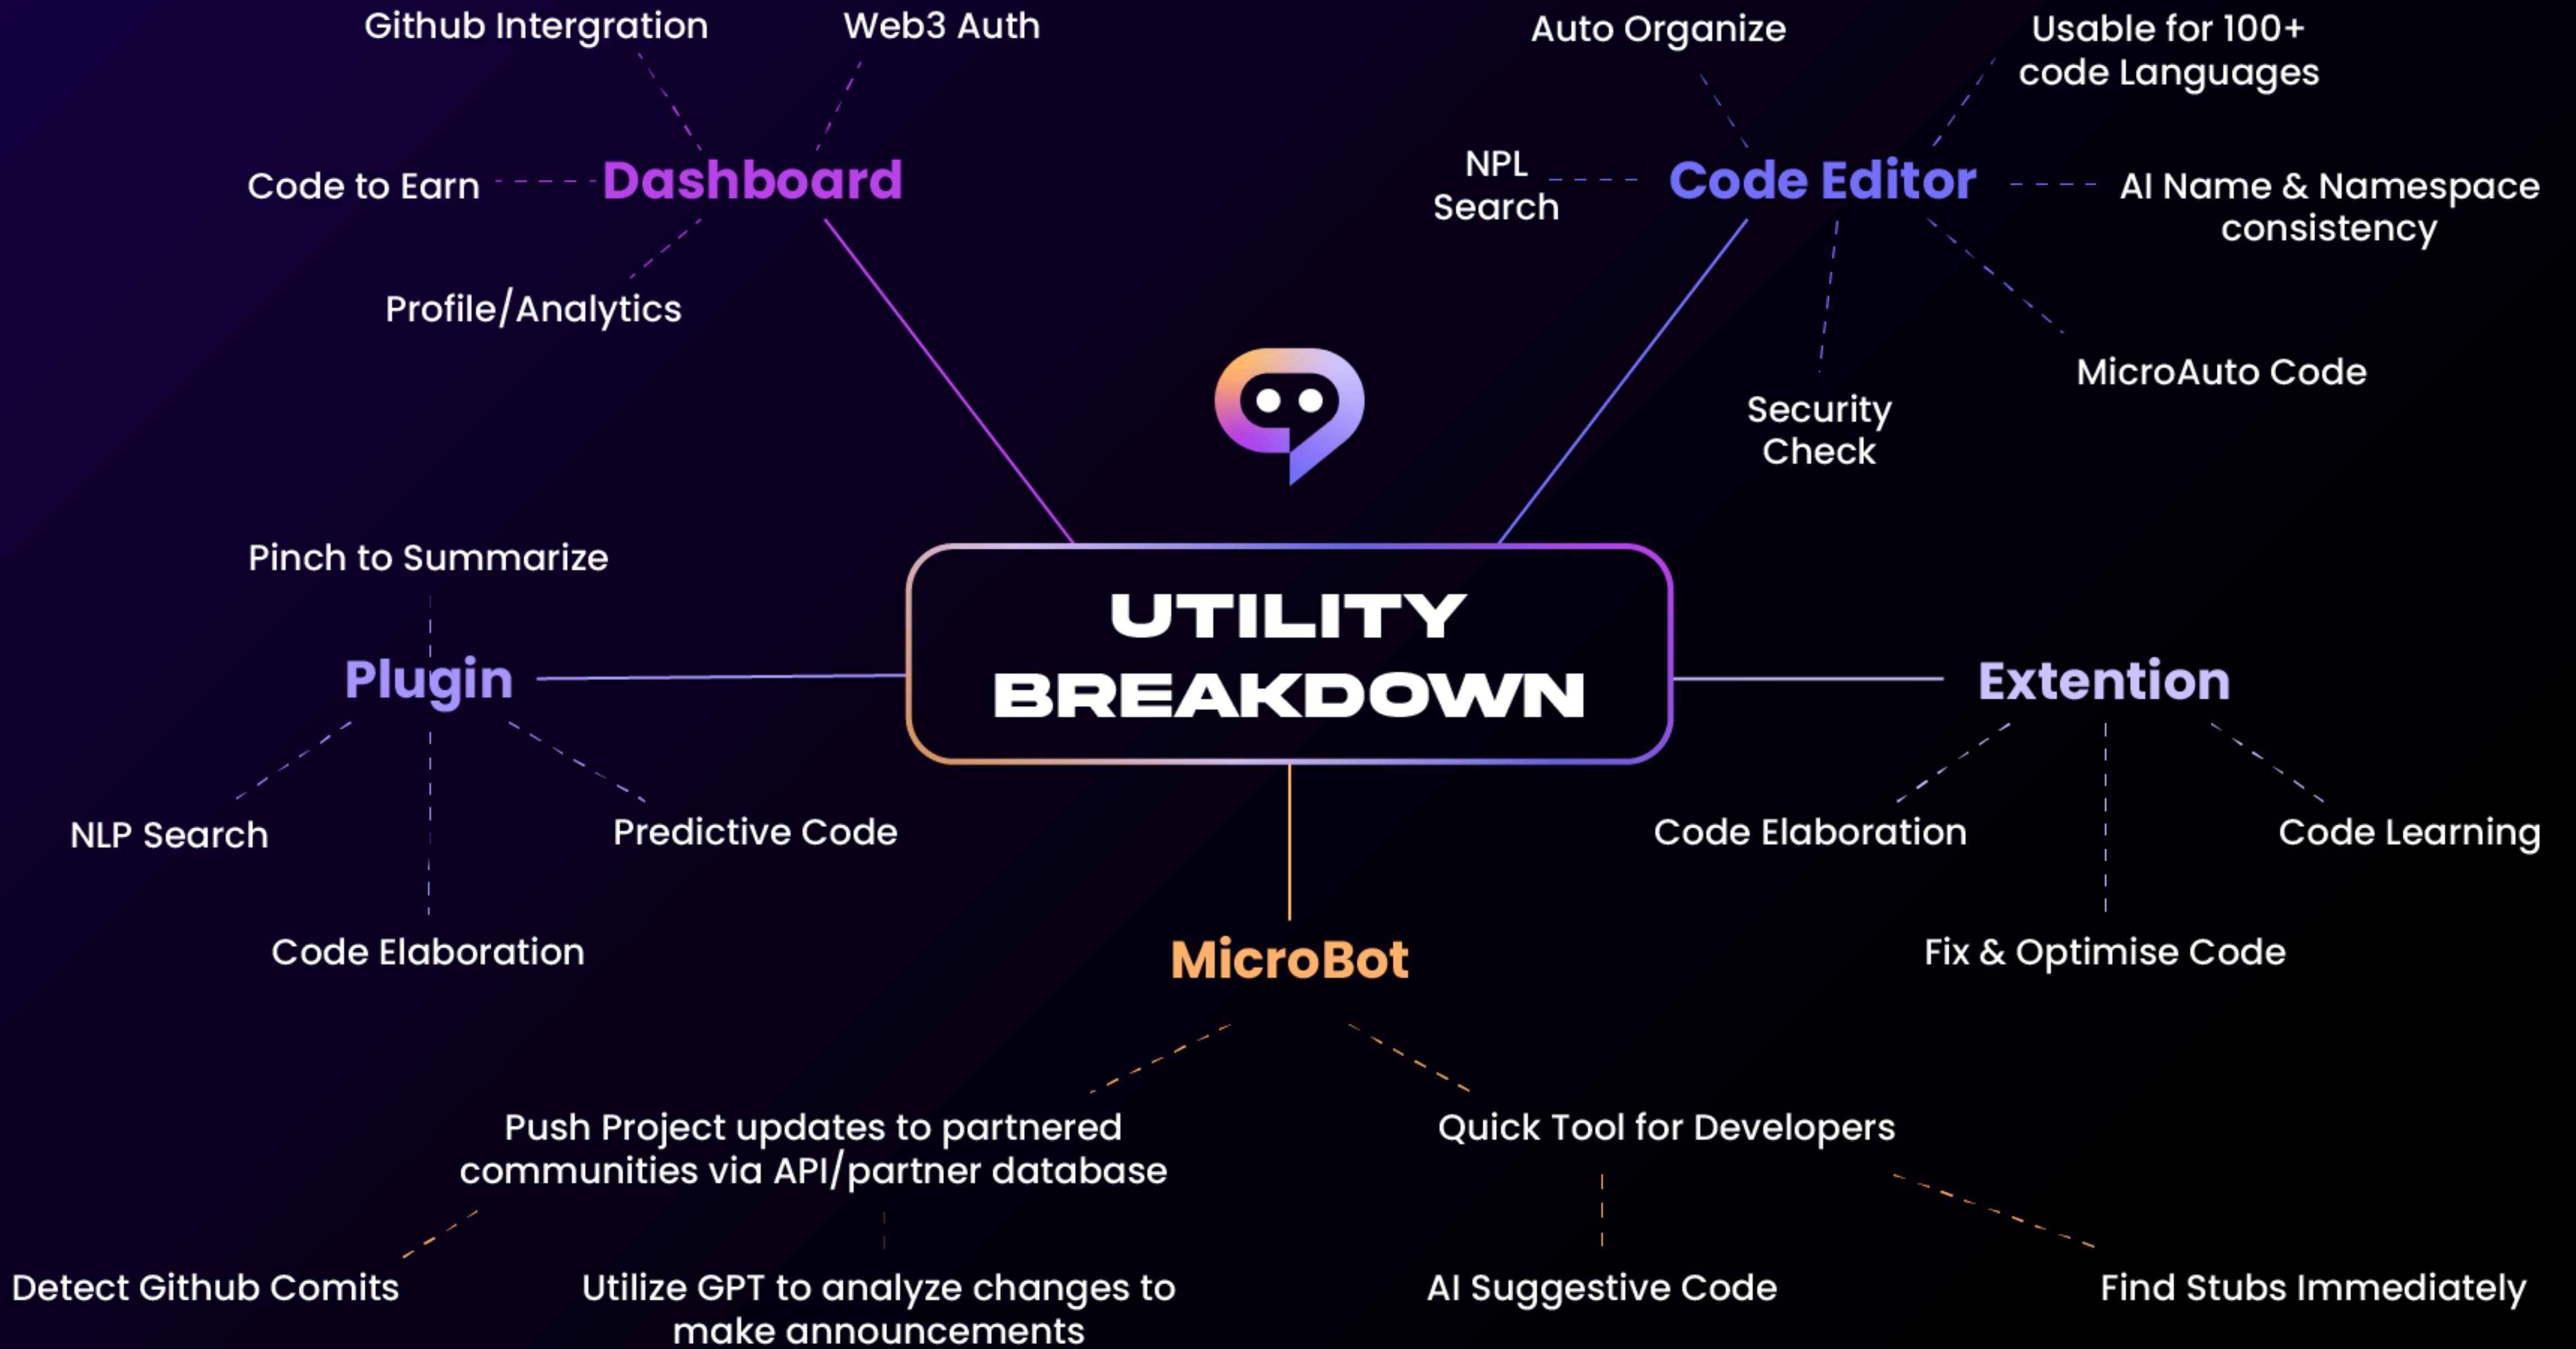

TAPPING INTO A BILLION-DOLLAR OPPORTUNITY

The global software development market is ripe for innovation. MicroGPT addresses critical needs, tapping into a multi-billion dollar industry with a unique offering that combines productivity enhancement with financial incentives.

SUSTAINABLE GROWTH

Our Business Model

MicroGPT generates revenue through premium subscriptions, marketplace transactions, and strategic partnerships, ensuring a sustainable and scalable model that benefits both developers and stakeholders.
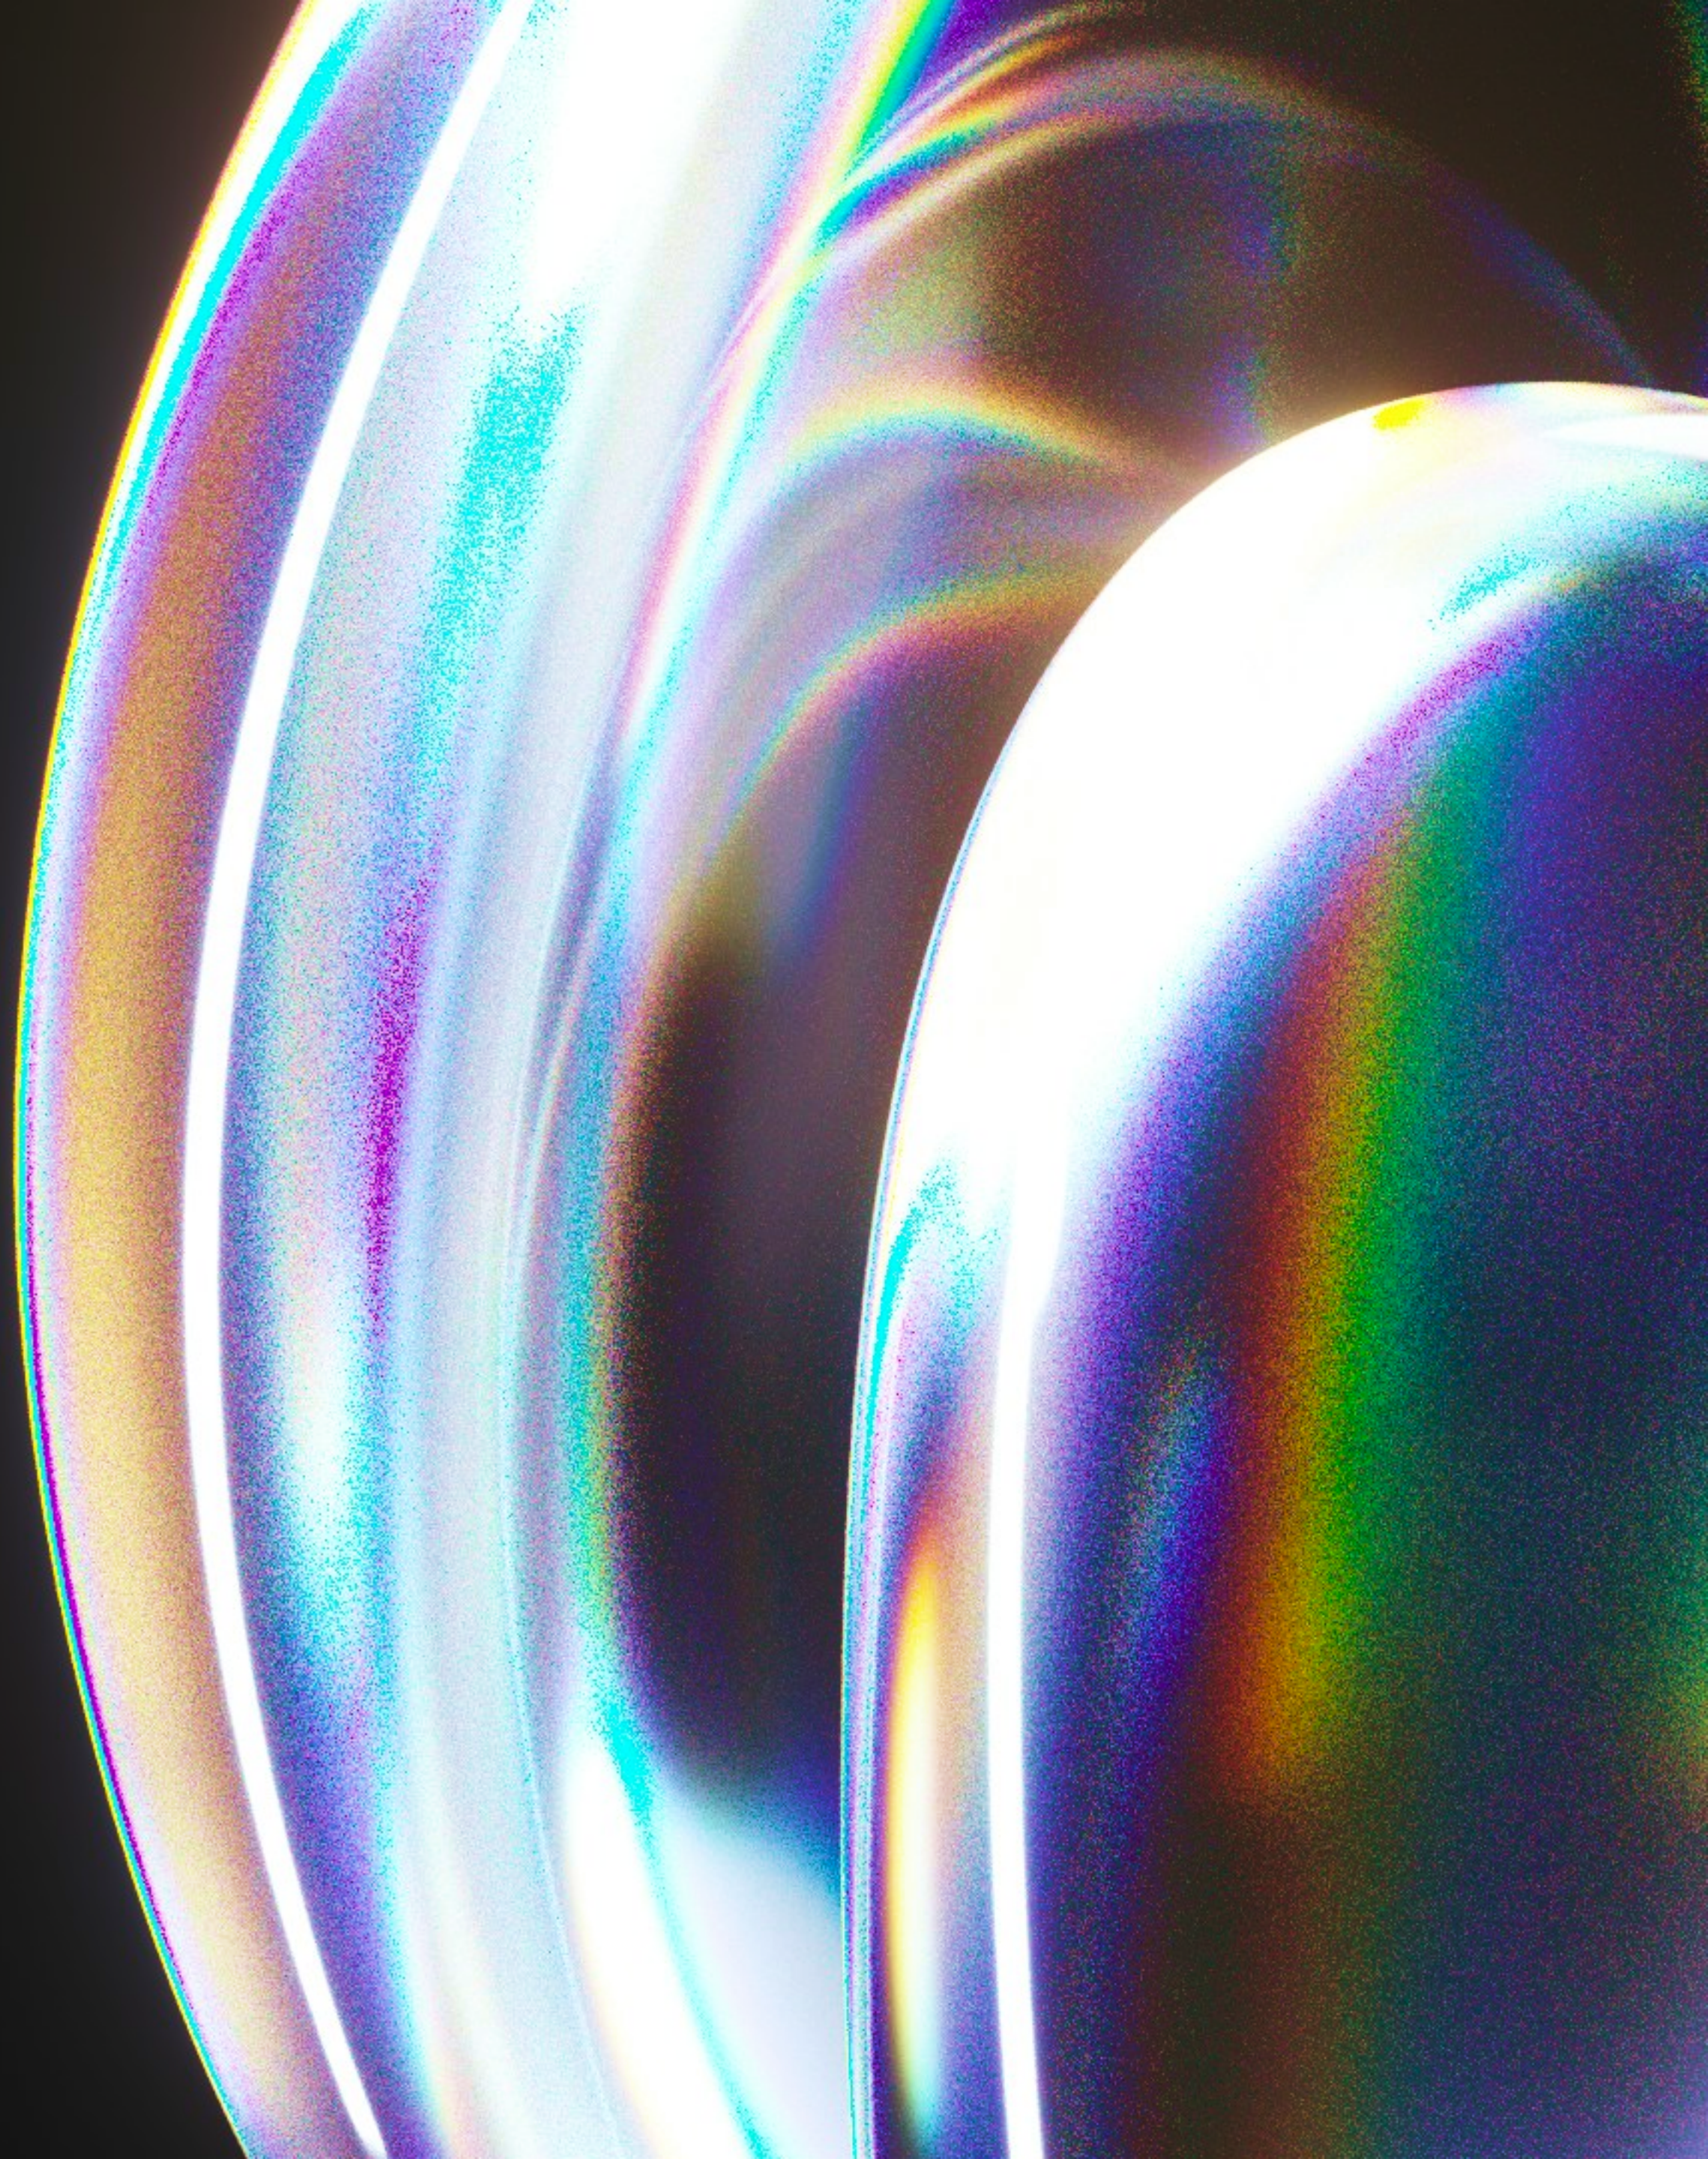

ROADMAP

Quarter 2 2024
Launch MVP
Chrome Extension for Remix IDE
Introduced the "Code to Earn" dashboard

Quarter 3 2024
Expand AI capabilities
User base, hackathons, and developer events

Quarter 4 2024
Introduce marketplace
Define and advance our product suite

2025
Scale globally - Commitment to continuous
innovation & community growth

THE MINDS BEHIND MICROGPT

Led by veterans from **Microsoft, Nvidia,** and **AMD**, our team combines expertise in AI, blockchain, and software development, driven by a shared vision to empower developers worldwide.

STRONGER TOGETHER

Our Partners and Advisors

Supported by the AMD Accelerator Program, Nvidia Inception Program, and partnerships with Google Cloud and Amazon AWS Cloud, MicroGPT is poised for success, backed by industry leaders

GET IN TOUCH

Join us in redefining the coding landscape. For investment opportunities and partnerships, contact us at the links below. Let's build the future of development together.
